

## Fund Overview

The Atlantic House Uncorrelated Strategies Fund aims to deliver positive returns across a wide range of market conditions, while protecting the portfolio from significant market downturns. The fund is designed to have low correlations to both traditional and alternative asset classes.

## Investment Approach

The fund systematically invests in cross-asset derivative strategies that have the potential to deliver diverse and highly differentiated sources of return:

1. Long volatility strategies: aim to profit from rising implied or realised volatility and may also act as a hedge against extreme market moves. This strategy includes Tail and Trend strategies.
2. Diversifier strategies: aim to generate positive returns in normal market conditions, regardless of market direction. This strategy includes Volatility Carry, Dispersion and Non-Directional Carry strategies.

Investments that meet the Fund Managers' criteria are allocated based on their specific contribution to risk to ensure the fund maintains a net long volatility bias.
